T

TRAINED

Do all workers have valid safety training certificates for a fall protection course?

M

**MANAGING
SAFETY**

Do they have a safety policy or program? Do they regularly inspect harnesses? Are workers always tied off when working at height?

I

INSURED

Do they have workers' compensation coverage? Ask to see a clearance letter.

Having contractors working on your home with safety training, WCB coverage, and a safety program will give you peace of mind that both you and the workers will be safe and protected if an injury occurs. Ensuring contractors are TMI is the best option as a homeowner to protect yourself and others from workplace and financial impacts.
